

# Open Access Policy By Sciences Force

## Overview

All articles published by Sciences Force are made immediately available worldwide under an open access license. This means:

- everyone has free and unlimited access to the full-text of *all* articles published in Sciences Force journals;
- everyone is free to re-use the published material if proper accreditation/citation of the original publication is given;

## Permissions

No special permission is required to reuse all or part of article published by Sciences Force, including figures and tables. For articles published under an open access Creative Common CC BY license, any part of the article may be reused without permission provided that the original article is clearly cited. Reuse of an article does not imply endorsement by the authors or Sciences Force.

## External Open Access Resources

Those who are new to the concept of open access might find the following websites or the *Open Access Explained!* video informative:

- [Wikipedia article on Open Access](#) 
- [Open Access Network](#) 

## Meaning of Open Access

In accordance with major definitions of open access in scientific literature (namely the Budapest, Berlin, and Bethesda declarations), Sciences Force defines *open access* by the following conditions:

- peer-reviewed literature is freely available without subscription or price barriers,
- literature is immediately released in open access format (no embargo period), and
- published material can be re-used without obtaining permission as long as a correct citation to the original publication is given.

most articles published by Sciences Force contained the note: "© year by Sciences Force. Reproduction is permitted for noncommercial purposes". Sciences Force journals started to publish articles under the **Creative Commons Attribution License**® and are now using the latest version of the CC BY license, which grants authors the most extensive rights.

This means that all articles published in Sciences Force journals, including data, graphics, and supplements, can be linked from external sources, scanned by search engines, re-used by text mining applications or websites, blogs, *etc.* free of charge under the sole condition of proper accreditation of the source and original publisher. Sciences Force believes that open access publishing fosters the exchange of research results amongst scientists from different disciplines, thus facilitating interdisciplinary research. Open access publishing also provides access to research results to researchers worldwide, including those from developing countries, and to an interested general public. Although Sciences Force publishes all of its journals under the open access model, we believe that open access is an enriching part of the scholarly communication process that can and should co-exist with other forms of communication and publication, such as society-based publishing and conferencing activities.

**Important Note:** some articles (especially *Reviews*) may contain figures, tables or text taken from other publications, for which Sciences Force does not hold the copyright or the right to re-license the published material. Please note that you should inquire with the original copyright holder (usually the original publisher or authors), whether or not this material can be re-used.

## Advantages of Open Access for Authors

**The High Availability and Visibility** of our open access articles is guaranteed through the free and unlimited accessibility of the publication over the Internet. Everyone can freely access and download the full text of all articles published with Sciences Force: readers of open access journals, *i.e.*, mostly other researchers, do not need to pay any

subscription or pay-per-view charges to read articles published by Sciences Force. Open access publications are also more likely to be included in search engines and indexing databases.

**The Higher Citation Impact** of open access articles results from their high publicity and availability. Open access publications are demonstrably more frequently cited.

**Faster Publication** in Sciences Force's open access journals is achieved by online-only availability. Accepted articles are typically published online more rapidly in Sciences Force journals than those of traditional, subscription-based and printed journals are.
